## Seismic Provisions Reviewed

Portions of the current draft of the American Institute of Steel Construction (AISC) standard, Seismic Provisions for Evaluation and Retrofit of Existing Structural Steel Building (AISC 342), are available for public review until Nov. 4. The provisions will likely replace chapter nine of the standard by the American Society of Civil Engineers (ASCE/SEI 41)— for the seismic evaluation and retrofit of existing structural steel buildings.

American Structures has been a member of the ASCE for a number of years. Thank you ASCE for your continual work revising and updating standards.

Did you see our booth at **weftec19**? The conference & exhibition was held in Chicago, IL. Our booth was one of 992 exhibitors. We enjoyed visiting with several of our customers in the water industry. WEFTEC19 was one of the largest crowds in a decade, with 22,500 registrants. Texas and Colorado teams won the Operations Challenge Competition. Next year's **weftec20** plans are already in the works for October 3-7, 2020 and will take place in New Orleans, LA.

## Bolted Stainless Steel Tanks Menomonie, WI

American Structures, Inc. recently completed the fabrication and assembly of two bolted stainless steel tanks at **Rich Products in Arlington, TN.** Each tank has a storage capacity of 150,000 gallons.

The dimensions of each tank are

30.77' (Dia.) x 28.83' (Ht.).

In addition to the tanks, American Structures, Inc. also manufactured the 304 S.S. floor, 1:12 pitch S.S. roof, safety ladder with lock-out and safety railings.

The grand total of parts and components equals 36,644 for each tank. Both tanks will be used for Waste Water Storage.
